Dear Clive

Corporate video production

Just a short note to thank you for the fantastic corporate video you have just produced for us.

Obviously we gave you a pretty broad brief, but we all agree that you managed to capture the essence of Whitaker's in a most professional manner.

As you know a short "sound bite" of the video went onto our new web site and several people have commented on how impressed they were with it.

It has been a pleasure working with you and we have enjoyed your incredible attention to detail throughout the project.

I appreciate that it has not been an easy task trying to capture the day to day routines of a working ship, but you have somehow managed to do this without once interfering with the operation.

I think that the crews actually enjoyed having you onboard, which speaks volumes for the way you have conducted your work in such an enclosed environment.

We will most certainly be using your services again and would not hesitate to recommend you in the highest manner to any potential clients you may have in the future.

Yours sincerely

Mark Whitaker Managing Director
